

Making Your Artwork Files Print-Ready

Colour label with hot-foil stamping

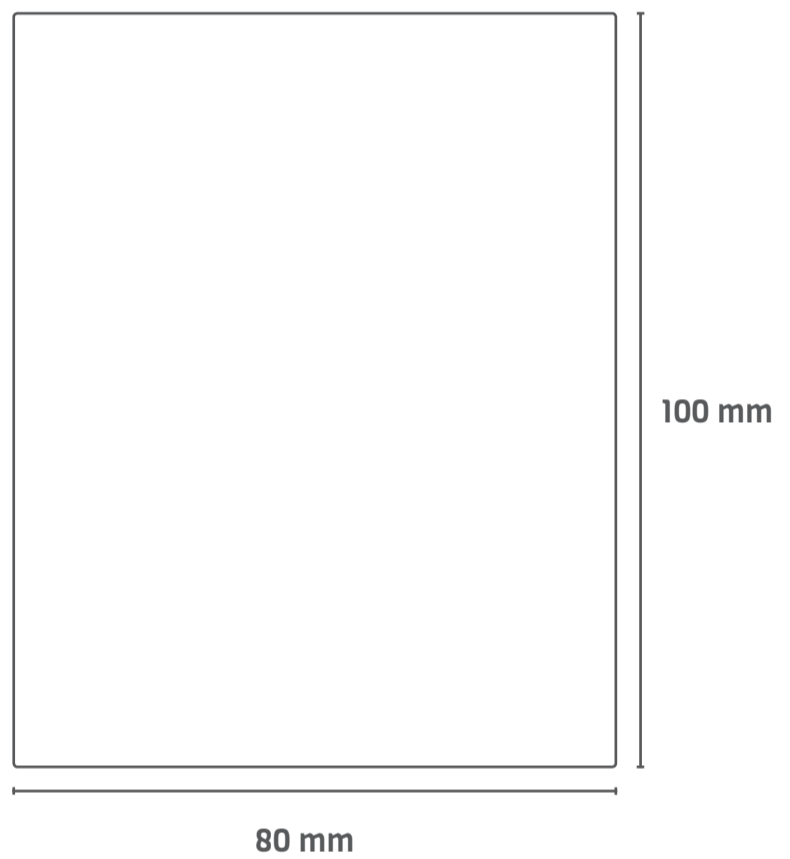

Please incorporate a 2,5mm border around the data to allow for cutting.
For a white undercoat or an opaque white print, please select 'HPI-White' within the 'spot colour' menu. For an hot-foil please select 'hotfoil' within the 'spot colour' menu.

Please illustrate the die cutter by selecting 'cutter' from within the 'spot colour' menu.
Please ensure that the die cutting layer is placed above all others and can be seen.
